

# Our Future

AgResearch is the Crown Research Institute tasked with delivering leading agricultural science and innovation to benefit the wider New Zealand economy. Our internationally-recognised scientists work across the agricultural sectors in collaboration with a range of stakeholders both nationally and internationally, putting science and innovation at the forefront. We are a unique organisation that is driving prosperity by transforming agriculture.

## Food Science Leadership Opportunity

### Science Team Leader, Meat Quality

#### The role and opportunity

AgResearch's Food & Bio-based Products Group have recently experienced a great deal of growth and, due to this, are looking for a highly motivated and passionate Science Team Leader to join the Meat Quality team in Palmerston North.

Reporting to the Science Group Leader you will lead the Meat Quality team and manage research projects to deliver high quality scientific and commercial outputs. This opportunity would suit an experienced and reputable scientist, well connected with industry stakeholders, that has a sound understanding of the current challenges and trends regarding food production, processing and regulation and consumption.

#### What you will be doing

- Leading an engaged and high performing team to deliver group strategy/roadmap.
- Identifying new opportunities in R&D and delivering high quality scientific research within budget.
- Contributing to and leading the development of successful internal and external funding proposals that attract significant revenue and offer solutions to existing and new customers.
- Establishing, building and maintaining relationships with stakeholders and customers.
- Contributing to the advancement of scientific knowledge by actively participating in industry events and staying active in the wider food research communities.
- Demonstrating science credibility by publishing research in world leading publications
- Contributing to the leadership of the Food & Bio-based Products Group.
- Setting science, capability and people vision/strategy for the team.
- Coaching and leading a passionate and motivated team, creating a positive culture and supporting the professional development of employees to achieve performance objectives.

#### Your ideal background

- PhD degree that includes at least 10 years of research work relevant to food or meat sciences.
- International reputation based on knowledge and in-depth expertise in food sciences such as meat science or equivalent.
- Proven track-record providing thought leadership and innovative solutions in the agricultural and food sectors.
- Noteworthy international peer-reviewed publication record.
- Excellent leadership and project management skills.

#### Our Benefits

AgResearch provide a diverse range of benefits including flexible working options that help our staff balance their own lifestyle and needs with their work commitments. You can view the full list here:
