

QC Technician (Night Shift)

Great product, great company culture, great opportunity to progress your career in food quality. Apply now.

- High profile, fast growing FMCG company
- New / recent graduates considered
- Fixed night shift (9pm - 5.30am)

The opportunity

This highly creative and entrepreneurial home-grown New Zealand company has become well known for producing great tasting product using the finest ingredients. Here is an opportunity for a new or recent graduate Food Technologist / Quality Technician to join their Quality Team to ensure their exacting standards continue to be met.

The role

Reporting to the Quality Manager, the successful candidate's main responsibilities will be to conduct daily line checking and sampling, coordinate product samples for testing and retention, and conduct sensory and chemical analysis of products. Other duties include equipment calibration, monitoring of hygiene, staff training and ensuring compliance to SOP's.

Note – while the role will involve some analytical testing, this is primarily a factory-based role so experience working in a production facility, rather than only in laboratories, is important.

Skills and experience

- Ideally a science-based degree (Food Tech, Food Science or similar);
- Up to 2 years' experience working in a Quality or Laboratory based environment;
- Understanding and experience in control of HACCP and ISO9001 Quality systems in the food industry;
- Strong written and verbal communication, ability to communicate in a clear and convincing manner;
- Positive, "can-do" attitude.

How to Apply:

Apply now by clicking this link: <http://adr.to/cg4us> and upload your CV in a Word document format. For a confidential discussion and further information, contact Yvette Harrison on 021 710 743.
