

POSITION TITLE

Food Technologist / Nutritionist ***Product Development Focus***

Location: Hamilton, New Zealand

Salary: \$80-100,000 salary negotiable based on experience

PharmaNZ supports flexible working arrangements

About the business and the role

PharmaNZ is on a mission to become a leading contract manufacturer and trusted source to the world's health supplements brands.

This role is for an ambitious food technologist or nutritionist, with a passion for creating new products. Reporting to the Technical Director, one of New Zealand's leading product development experts, the successful candidate will receive outstanding professional development and mentoring.

You must have:

- A high-level of knowledge of nutritional product ingredients and formulations
- A creative problem solving mindset with a can do attitude
- A passion for the health and wellness and nutritional supplements industry

Duties and responsibilities will include:

- Developing nutritional and supplement products from customer briefs
- Conducting laboratory formulation trials and scaling up to production
- Calculating product formulations and costings
- Assisting sales with technical service to clients

Experience and skills needed:

- At least 5 years' experience formulating and developing nutritional products
- Current knowledge of FSANZ regulations
- Ability to work both independently and in a team
- Outstanding creative thinking, analytical and problem solving skills
- Knowledge and experience with vitamin and mineral formulating
- Experience with flavouring of nutraceutical products
- Relevant tertiary qualification preferred

Job benefits and perks

- Competitive salary with progression opportunity
- Enjoy our Employee Benefits program which includes regular team building activities, professional development and more

If you meet the above requirements and our role requirements resonate with you, please submit the following to [**katrina.lehrke@pharmanz.com**](mailto:katrina.lehrke@pharmanz.com)
